Sir

Edinburgh 10 flew 1831

I forward a cask of your Order. I can & have sent  
in fine Casks in the Catherines for Greenock low  
£ 14. 0. b. They are sent to the care of David Pirie and  
Greenock who will pay the charges on your ac't  
or off he pays on my ac't I will put it to your  
abilit. I should wish your Orders in the much  
larger way. One gross berries done in time a note  
of the List is on the other side. I will take an  
ordinary quantity of seeds from you & send  
you £ 5. 0. to take for the present.

I am quite short of most Roses but have about  
200 sorts named and so sorts of double Scotch Roses.

I would recommend 10 of each sort to your notice.

My Cabbage Turnip seed are also fine.

Daniel Ferguson (Wife of Charles the)

Mr

Kilmarnock Aug 1831

We have your 12 the 24<sup>th</sup> rec'd and wrote you on the 28<sup>th</sup> December to advise you of our arrival and you as promised our service all went well to stand to your command Order the Evergreen (a tree we don't grow in) but the Double-flowered (the) plant is not to be had yet and of the other articles are either so scarce as to have none to spare at a reasonable rate or so small as not to come up to the size you want our Silver Nine plants are only 9 inches high - We have a large stock of Tuscan, Mignon, Celestial Gladholder Scarlet Provence & other good Roses of which we will send you very reasonable and will probably have larger of some of the plants you ordered next season the Pyracantha is only found in small quantities & is

Shrub with all the trees and shrubs carefully packed  
to your instructions —  
What would be the price of good *Kalmia latifolia*  
when you write next year, but in large double  
letters to be sent price of no feed only —

Invoice of Seeds Recd from Saugier frere —

My several letters proceeded the first of which was the Draft for \$76.76. If I had not been much in want of money at the time I should have sent it back by return of mail. It is not right I should lose the Grapes vines. I could have got more than a thousand since that time at 25¢ it is hard to be at the trouble of raising packing &c for nothing. As to the raspberries they were obtained from good we have never propagated any other

## *Magnolia grandiflora*

Convict labor sue two \$100000

Soulette Rose

Perminow

Mr. & Mrs. Leffler were from Thomas J. Pease's table  
Pittsburgh, 3 Mar 29, 1881

102 - 1 Bland's Cuttings sent to me by

395 Cuttings of Bland's Cuttings

all pretty well packed, which I hope may reach the new  
place safe. I would like to send in the Cuttings as soon as they  
arrive. There is a memorandum in the Box, stating  
the contents & who they are from.

I concluded to send the Cuttings of the white Bland  
for if it should prove as we desire, there will be some  
several acres in the next season. I have had the  
idea of taking much space or room. The B.C. will  
do things as we now see, there are very good, & I do  
think they offer to place the value of them to my  
credit & shall not object.

I have sent them off soon as possible, and they  
will no doubt be in good time. I have not attended  
nearly the Cuttings or any roots yet though, &  
expect them to be in the ground now, we have  
no root to catch, & the seedlings

Mr. Parrot

the due receive yours of the 20th how art  
you doing, I hope you have had the advantage  
of the winter of milder weather to get well again  
I am not what you call strong but I am getting  
on well thank God. We have received the last  
bill up to your order the 10th being but want  
to do not know when paid in the rest. There  
are one or two little things I have not paid  
which you have sent me but I am not  
sure what they are for I am not quite up to  
date with my books. I have got a balance  
of £11.00 to pay you when you receive  
the last bill.

Yours left 163

obtained in your visit outside the village  
the second of the second. The author has  
a short account being to the effect  
that you are not to take

47 Seed of a vine called *Ipomoea* which  
looks like a little potato but is  
the United States. Please, but in Germany  
or elsewhere will this

48 Considered *Ipomoea* with a few  
varieties, what really distinguishes  
the species is the leaves all of them  
are 9 in with a large hand-like leaf  
a 4, 7, and 12 ft. another long narrow leaf  
and a smaller one similar to the middle —  
leaves, a small which the flower comes from  
the climber

49. This with a large leaf not round, leaves  
12, 2 in, branching the climber, no  
seed or a slender vine, and one is to  
produce fruit eaten by the natives  
the appearance of the vine like a  
rod, I would, in not less than a foot  
of climber from the top

50. Please, at once see if you have to  
a root or not, a large leaf, seedlings  
10, 12, 14 in

51. The above order, the production of the most  
and least, and the first of the vines  
in the south of the United States

are now rare. The earliest to appear are in  
the middle of May, from the south down to the  
Carib. sea now almost entirely extinct  
with the exception of the China tree.)

Recd from Mr. Remond April 1881

1 Bushel of white cherries

1 bushel of small cherries to 1 bushel

1 bushel bush strawberries

1 bushel

1 bushel of green strawberries

Spent the day writing  
privately to various  
writers and authors  
selected & copied  
selected & copied  
x I Day Large & Natural History  
x I Theatrical & Musical  
Catechism

x I have written for a certain period now &  
I wish to be think of something to go off  
I do not think a new & more elaborate  
My own & Present situation may be  
the most accidental which there is  
not in the world & I will it, & I do not  
and take every thing in this particular  
allow in this particular

Aug 1. Eliza - After a short pause he has  
handed off the book to his wife, for whom he has  
he suspended it & told him of the matter. (was  
considered) in Chagster a large number of his  
old & familiar & friends

had dropped in to visit him on that day.

He said "I am old & I wish to be, but I have  
now to go to work & have been told that I have  
now to go to work & have been told that I have

Evening October 10<sup>th</sup> 1863

Very dull and overcast with  
a few scattered clouds. The sun did not  
rise until 7:30 a.m. and did not set until  
5:36 p.m. The clouds were very dense and  
the wind was very strong and gusty.  
I have written to Mr. Faxon about  
the bird skins and he said he would be  
glad to receive them. I will do so as soon  
as I have time.

Charadrius vociferans

Several shot yesterday have not been identified.

From Dr. Jacob Porter of New Haven dated Oct. 25<sup>th</sup>  
He has sent up for you to have a look at the  
specimens and I will do so. No. 34 & 35. No. 34 contains a fine  
specimen of *Gauthieria hispidula*, a specimen of  
*Lechea tristis*, anthers, anthers, hypanthium, & a  
calyx. No. 35 contains a specimen of *Lechea marginata* flowers  
& a calyx. The Conacanthus No. 36 consists of two  
specimens of *Lechea marginata* except one which is  
the same species. Section No. 37 which contains  
a single specimen which I think is a small like  
the *Lechea marginata* but the leaves are smaller and  
the flowers are not so large. I have not  
seen any *Lechea* since I have been here  
and I have observed that the species  
here are not so large as those in the South.

from John Lee Barber that 2<sup>nd</sup> May 1850  
I am about 1000000 feet of  
chicory that a few days ago you wrote  
you wanted to have it, I have 1000000  
feet of the 1850 crop. I have also some  
young chicory, this from the last  
hills, a comfort at first a few days  
ago but now

---

Extracts from John Lee's Letter dated 13th  
Nov 1850—

I will send you via Green's in 5 days a  
few bushels of the chicory and the  
information in your letter, sensitive to  
wind and rain of ~~just~~ <sup>so far</sup> ~~extreme~~ in the ~~country~~  
around Palmetto a beautiful and a  
handsome winter and can be sold  
as well as the Succulents growing in Lincoln  
and of great high & bearing a fine crop  
I made an estimate from the way I found them  
about 1000000 a acre being a bushel to the  
acre and 1000000 bushels to the acre  
during the last 10 days of October I made it  
with the help of a horse & very great trouble  
1000000 bushels on the other hand if  
the weather continues moist to the last the  
crop of the drought has got no chance to  
grow in my ~~country~~ I have a horse & a team but  
to drive and then you have the weather

vine but cannot be sure of this. The substance  
of the vine and stems mixed the root. The  
flower is reddish, variously fragrant as  
the Galanthus is a flower that unique as far  
as we experienced. on Yehunge below the  
line of vine first white then purple, then  
yellow the leaf stalks very much resemble  
those of the Lianas. Below the root system  
flat dark brown or Lianas would scarcely  
be enough to represent them. We never  
~~but kept~~ <sup>up</sup> a week beyond the root  
and enough the plants that have the  
olive green if the root is ripe it is no  
so some that were sent to me from Vilcan  
years since but so far nothing of Lianas  
I do not know

Wm. Willow G. Hunt. Louisville. Feb 21<sup>st</sup>  
I forwarded a few days ago to you, via Mr. John  
Berkeley Co. at New York a letter to  
Mr. Octoloch containing a few seeds. I have  
a dear friend Mr. Geddie G. Smith who has  
been for several years running the boat the  
Rocky Mountain, from the Pacific to  
Columbia River on the coast of New Albion. It is  
now to be he packer had been put up  
a letter written a short time ago to  
the following effect

all your M. Country, & will be to the  
end of my letter. I beg you to add so a  
place to your name this day next, for to Post  
Office, & the Postman & now write to the  
Postman at first of a few words of warning  
that I am from the County, and have  
no money and will be obliged to pay all  
what I owe, & that I am in the country  
now & have not the money, and am obliged  
to take what I can get, & when I get home, I will  
pay all. The sum I owe you is to say  
how much I owe you, & then pay it, but it is  
to be a true fact, that I am not able to. I told  
you before they went for me, they  
ought not to give me the money, & by  
the way better look to me in the Country  
now, & are more interesting plants &  
not so easy to identify. Consider it to be my  
privilege. I have to thank you for your  
kind regards, & will send you my best  
wishes & a wide welcome to you —

Yester even. Post Office, by 8 P.M. 30  
of the day before the day mentioned in  
my last you at least from containing a few  
days to the 1st of the month, when you  
will be at the Post Office, & one week before  
the 1st of the month, & you will be at the Post  
Office, & the Postman will be there, & you will

you have got a good view of your bush  
I hope I understand the composition of your soil  
but I think that is the case. Small grape  
vines have the same kind of grapes as bath  
large & fruit following from the bunches  
I don't notice at the present any insects at  
all on the bush which is probably too thin  
to support a number of insects to do me  
any damage. I note by its protracting itself  
to stand upright the fact of other grapes  
of a weak vine or bush to be very  
unreliable & I am afraid of the same  
for this bush.

Will you tell me & the Cat. Rd. what life  
of the bee colony you have found you will  
take care to add besides one for myself that  
place will be generally supplied with the  
kind of bees you will have in the neighborhood  
but not for several weeks but however  
this season there will be a  
few bees in the bushes & flowers  
in my garden one a thin black wavy  
wings & black must be the Queen, a black one  
that will not run if a dark one  
can not be the Queen. I am not sure, the  
bee here in the flowers etc. in the garden  
are for me & not for this bush but  
I think the bees here, the

White Maple as sample of  
the Mirror-leaved or Dwarf species

Dr. one. Camero. the 12th 1870 went to the Congo  
Brock Ch. 100 miles. A new project in this field  
of science. We do not know where it was sent to  
or if it was sent to me from Dr. W. or  
the Bureau of Ethnology.

with wood planks to form a wall of 6 or 8 inches  
to the wall board. It is the only protection to your  
trees from frost damage varieties but I have  
been disappointed in receiving them, a great  
portion of my quantity does not now bear  
the sea freight promises to bring them with  
him in his return if so I will share them  
with you, though all accept them are probably  
superior to most of the wild vines which  
have of late years been introduced into our  
gardens. I present this considerable variety  
in hope of a fair flavor & flavor. I read in some  
of the trees you sent me that the vines  
are so weak I fear they will not survive  
the winter frost, of those sent me last fall  
from New York they are all dead  
or gone. Not one prospers here. I should like to have  
you supply a strong winter vine for me. The  
Chasselas & fruit I have had a few vines  
of Jonas or Pausas, if it has any reputation  
as a vine or table grape. If you have no  
strong winter vine will consider the  
purpose. You but I continue to sell his vine  
here in small quantities from 1 to 50 lbs. Cire  
would not be so good for our sales

for Green Chasselas 100

2 White Burgundy 100

3 Montrachet 44

4 Clapier

July 1, 1859 - Monday

W. Hill & Co. - a basketful of fruit with  
Lau lat. in. atom

Wine, Cider, Liqueur, etc.

Ent. by J. Bridge, Dr. ton

These horses with a good deal of care  
Cotton with the loose, fine and in pieces  
will be better broken & rendered  
you may rely on this for, by which  
you will know. I would have said more but  
in total absence of demand for the horses  
I might say should be sold to you

Letter from Dr Jacob Porter Plainfield June 23/31  
I send you a Kid Boy of Plaster about 6 feet high  
Painted. Head 30. consisting almost entirely  
of a William picture and Steele clay figures  
I went to your Agent at Southampton  
The season & the I have done so little for you  
this reason is I was very sick during the  
months of March and April with the most  
severe & distressing illness but have since  
I have not yet fully recovered. Our Stamps  
now are now extremely wet so that is difficult  
to visit them - I hope however to come  
on by & by and forward something more  
I have just received a note from the Philadelph.  
Historical Society for America. Books for their  
Library. - Perhaps you would be willing to  
visit in Philadelphia, if you have not already done  
so - I thank you for your Catalogue, which  
will be much needed. My health is still feeble  
and I have some idea of visiting New York  
and Washington in the face of spending a week  
or so with you, if you will allow it to do so  
for its restoration.

Letter from E Smallwood Newbern Mar 13  
I have sent to Mr Hobl Beckwee who  
is in charge of the Newbern Academy. At the close of  
the 1st year he sent to the same boy I have  
sent the Pictures of Williams wife

I have written to you to  
you will be 3 or 4 days after returning to the U.S.  
I can be in Philadelphia, your City some time  
later, and to see the Grapes & Currants you  
Order, & I should like to get some of the best  
varieties of a good size and some large early  
Bushes. What are the best kinds to be sent  
from Georgia? They must be old varieties & they can  
be shipped you by other means, great distances or through  
which you may think preferable to go to me  
I will receive with thanks.

---

Letter from Dr. Heudelet, Murphy's Brook New Cottrell, Ga.  
I have just received a box so late from Mrs.  
Cecilia Grafe you will send to her of Mr. Gibbons  
who lives in Trenton, Gibson County, Tenn. Part  
out of the slate between the Tennessee &  
Mississippi River, called with us the Western  
District. Mr. Gibbons says to me that those  
seed were obtained from some wild Melon  
fruit growing in that County. I hope this  
are emulated will be acceptable to you.

---

Letter from Mr. Herkemont Columbia, Ga.  
I have just received your letter & the 1<sup>st</sup> of  
inst. I had just on board of boat going to Savannah  
a small bundle from Mr. Gibbons of Currants  
& the like, 2 lbs of Grapes, 1/2 lb of Raspberries  
& 8 Cuttings of Grapes & vines \$11.00 worth.

Dear Mr. J. J. Gavie wrote to me to request  
me to send you a few Cuttings of the vine  
he spoke of in such high terms. We send that  
which we hope you will like. We have Major  
Gilmard who have carefully by means of  
grafting, & have that when you see them will  
you will be much delighted as the var-  
yous attention you favor may be called  
to you. At the same time the Cat is not generally  
called a vine, the vine being a woody  
plant branched for the first time. I give you the  
fruit which we think the tree will bear if  
it can be got, it is certainly different from  
any I have seen, the vine might be situated  
well located for a New Home. We have great  
hopes for success from what is said by Mr. O.  
You may often see it in the vine  
this name is however I think the other one  
native which you found growing in a me-  
adow in the Andes. As his name was  
S. A. I named the vine after him. We have  
done one of the most promising grapes here  
but it has very large rough leaves covered  
below with a thick russet down the fruit is  
covered with coarse hair resembling like the  
inner stalk of grape, but the fruit is beautiful  
of black the berries rather larger than those  
of the common Muscat the flavor about  
double the size, its pale and very slightly

Master, I have only one wine & in which have not  
yet, borne fruit. I send you also - ~~one~~ the Cutting  
of par. The Aero I add & send the prop. sat  
of Cuttings that I now have & when in  
Culture I particular, as the wine I have  
made of it since the first is not as good as it  
was very strange for this first I made was very  
delicious. I send you this in a box, it came  
from Cuttings. His address in the Aeroplane by  
the name of Gummie People

The parcel is a bundle, the wine in a box & wine  
is a box containing 3 pieces in a friend of mine  
in Charles I - had pleasure to put it in  
case & pack it with the sand dust & sand has  
no wine, are packed with the wine this is what  
to pack it in, there is no charge as for  
receipt in with, if you want some for better  
you know that I have not an excess or  
money with which to help you

route by which to send things to New Mexico  
The distance from New Mexico to this place is in  
Miles 30 days for wagons is considered a short  
time. 20 days to New Mexico & 10 days to  
A. Hatch from which to Mimbres or Taos 50 miles  
10 days by wagon total 22 days from the  
M. & P. to New Mexico 10 days to Taos & 12 days  
22 days day 30 from Taos to New Mexico is 20  
days which can be expected —

Letter from W. E. Hulins Water, N. M. Oct 1<sup>st</sup>  
Will you will find in the package a large  
bundle of Heddle's Draw, San Juan, & the  
Pinedale C. & from the Archite sent me by the  
same day. All labelled — Although you did not  
ask for the two first as the right name of the  
line, I thought they might be recognizable to you  
as such and you are to please to do in the C. & the  
P. way. Cuttings of it, in your, I am at a  
loss for what, why you a master of the art, and  
we are to have to you, will I be a "zero"  
terrible error made — I send this post office  
Cuttings before I read your letter, as  
all of the last printed item of having it cut  
out as the cutting, I now forward to you the  
same line & think with pleasure over the much  
better — This is a fact, many invited me to say  
that I should like to have you make a model  
of the first 100 ft. of the C. & the P. in  
order to have a better idea of the

Letter announcing the reception of the order  
in that place. The order for the 100  
varieties I have now received is  
in full measure. I have had  
word of it —
